

NEW ROMER Omega Scanning System Launched at Westec

ROMER Inc, a Hexagon Metrology Company, is pleased to announce the North American introduction of the OMEGA portable measuring arm, our most economical tool for multi-purpose non-contact measurement to date. We are demonstrating OMEGA at Hexagon Booth 3600 at the WESTEC 2009 Exhibition, Los Angeles Convention Center, March 30 - April 02, 2009. The OMEGA system is ideal for 3D scanning applications such as reverse engineering, rapid prototyping, and non-contact inspection.

If you can't come to Westec, never fear, you can see an [Omega Video](#) online today!

Westec Special Package: \$49,999.

A complete package includes the OMEGA articulating arm, the R-Scan line laser scanning probe, and PC-DMIS Reshaper software. The entry-level, yet full featured Omega solution is specially priced at \$49,999 (model 2025/9 foot size), and is also offered in three additional sizes: 2018 (6 foot, 2030 (10 foot) and 2036 (12 foot). The seven-axis arm is comprised of advanced carbon fiber and aluminum construction, which translates into a very lightweight (about 12 pounds) shop floor metrology device.

The OMEGA series is a new offering of ROMER 3D portable arms that are fast, intuitive and promote measurement without constraints. Optimized for reverse engineering, the R-Scan non-contact laser scanner offers patented infinite rotation for scanning hard to reach areas. The OMEGA system also features large capacity inspection, repeatability, automatic color recognition, and real-time display of point clouds and point data.

Included in the package is PC-DMIS Reshaper software, a comprehensive 3D point-cloud processing program for users who need to handle rapidly generated point clouds and obtain high-quality 3D meshes. The software collects measurement data "live" from the arm, and rapidly creates and edits 3D polygon mesh models, which can be exported in a variety of formats, to either bring into a CAD program for further processing or STL files to print to a rapid prototyping printer.

The Special \$49,999 package includes:

- Omega 2025 (9 foot) Arm
- R-Scan Line Laser Scanner
- PC-DMIS Reshaper Software
- Laptop Computer
- Classroom Training
- Roller Case
- 15mm, 6mm and point hard probes

...but only until April 30th*.

Call 800-218-7125 today to schedule a demo or [inquire online](#).

Available Upgrades:

- Various stands, bases and tripods
- Battery Pack
- PC-DMIS Portable (PRO, CAD or CAD++)
- Different sized arms

Your purchase may qualify for section 179 Tax Deductions and accelerated depreciation. See our [Online Tax Calculator](#) for more details.

*Price quoted is in US Dollars. Offer available in the US, Canada and Mexico only. Offer expires 4/30/2009.
